 What is a "water level" used for? Name any two dangers of stagnant water. Why is a moon not regarded as a natural source of light? What is the difference between transparent and translucent objects? Name two major sources of energy used to cook food in Rwanda. Copper wires are used in electricity because: (Give two) Why is the air of the atmosphere important? (Give two) Name any two properties of solids. 	0	ther names :
 Name any two dangers of stagnant water. Why is a moon not regarded as a natural source of light? What is the difference between transparent and translucent objects? Name two major sources of energy used to cook food in Rwanda. Copper wires are used in electricity because: (Give two) Why is the air of the atmosphere important? (Give two) Name any two properties of solids. 	in the same of the	SECTION A: Answer all questions. (50 marks)
3. Why is a moon not regarded as a natural source of light? 4. What is the difference between transparent and translucent objects? 5. Name two major sources of energy used to cook food in Rwanda. 6. Copper wires are used in electricity because: (Give two) 7. Why is the air of the atmosphere important? (Give two) 8. Name any two properties of solids.	١.	What is a "water level" used for?
 4. What is the difference between transparent and translucent objects? 5. Name two major sources of energy used to cook food in Rwanda. 6. Copper wires are used in electricity because: (Give two) 7. Why is the air of the atmosphere important? (Give two) 8. Name any two properties of solids. 	2.	Name any two dangers of stagnant water.
 4. What is the difference between transparent and translucent objects? 5. Name two major sources of energy used to cook food in Rwanda. 6. Copper wires are used in electricity because: (Give two) 7. Why is the air of the atmosphere important? (Give two) 8. Name any two properties of solids. 		
 5. Name two major sources of energy used to cook food in Rwanda. 6. Copper wires are used in electricity because: (Give two) 7. Why is the air of the atmosphere important? (Give two) 8. Name any two properties of solids. 	3.	Why is a moon not regarded as a natural source of light?
6. Copper wires are used in electricity because: (Give two) 7. Why is the air of the atmosphere important? (Give two) 8. Name any two properties of solids.	4.	What is the difference between transparent and translucent objects?
 7. Why is the air of the atmosphere important? (Give two) 8. Name any two properties of solids. 	5.	Name two major sources of energy used to cook food in Rwanda.
 7. Why is the air of the atmosphere important? (Give two) 8. Name any two properties of solids. 		
8. Name any two properties of solids.	6.	Copper wires are used in electricity because: (Give two)
8. Name any two properties of solids.	7	
	/.	VVhy is the air of the atmosphere important? (Give two)
	γ Q	Name and the second sec
9. What is meant by the term "mass" of a body?	ο.	
	9.	What is meant by the term "mass" of a body?

	tate any one law of reflection of light.
V liç	Vhat is meant by the term "refraction" as applied to an oblique incident ray o ght travelling from air through water?
M	lention any two methods of heat transfer.
Be	elow is a diagram of a simple electric circuit. Why does the lamp not light?
Dr	raw the diagram in question (I4) so that the lamp lights.
M —	lention two uses of electricity in homes.
No	ame two sources of sound.
- Gi	ive two examples where sound is stored and is heard whenever it is needed.

How can you change the sta	te of ice to liquid stat	·e?
Name two types of shadows	S.	
Heat energy is used for: (Gi	ive two)	
Two properties of magnets	are:	
What is a "magnetic compo	ass"?	*
SECTION	B: Answer all questic	ons. (50 marks)
Complete the table by filling		
An example is done for you	· ·	
Deficiency of (lack of)	Disease	\neg
Proteins	Kwashiorkor	- ·
-	Rickets	7
Iodine		
	Beri beri	
	Deri peri	

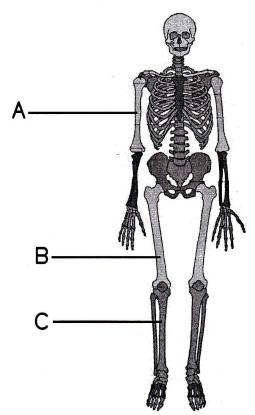

27. The diagram below shows the process by which a bean seed grows into a plant.

Stage	Α	В	С	D
Length(cm)	0.6cm	2.0cm	7.0cm	II.Ocm
Appearance of seed/plant	Q			

1 0 1	
b. Give three condition	ns necessary for the process above to take place.
	tres (cm) has the bean plant grown from stage B to s
a. The reproductive pa	
b. Give two uses of flo	owers in the environment.
a. The difference betw Pollination is	veen pollination and fertilization is that;
Fertlization is	
	III.
b. The two types of po	llination are:
c. Fill in the blanks wit	h the appropriate words:
c. Fill in the blanks wit After fertilization, t	
c. Fill in the blanks wit After fertilization, t	h the appropriate words: he becomes the fruit and the become the seeds.
c. Fill in the blanks wit After fertilization, t	h the appropriate words: he becomes the fruit and the become the seeds.
c. Fill in the blanks wit After fertilization, t ————————————————————————————————————	h the appropriate words: he becomes the fruit and the become the seeds.
c. Fill in the blanks wit After fertilization, t ————————————————————————————————————	h the appropriate words: he becomes the fruit and the become the seeds. tch the following organs of the urinary system to thei
c. Fill in the blanks with After fertilization, the Manager (→), mathematical functions: Organs	h the appropriate words: he becomes the fruit and the become the seeds. tch the following organs of the urinary system to thei
c. Fill in the blanks wit After fertilization, t ———————————————————————————————————	h the appropriate words: he becomes the fruit and the become the seeds. tch the following organs of the urinary system to thei Functions where urine is produced.
c. Fill in the blanks wit After fertilization, t ———————————————————————————————————	h the appropriate words: he becomes the fruit and the become the seeds. tch the following organs of the urinary system to thei Functions where urine is produced. brings urine from the kidneys to the bladder.
c. Fill in the blanks with After fertilization, the second secon	h the appropriate words: he becomes the fruit and the become the seeds. tch the following organs of the urinary system to thei Functions where urine is produced. brings urine from the kidneys to the bladder. where urine is stored.
c. Fill in the blanks with After fertilization, the second secon	h the appropriate words: he becomes the fruit and the become the seeds. tch the following organs of the urinary system to thei Functions where urine is produced. brings urine from the kidneys to the bladder. where urine is stored. where urine is eliminated from the body.

c. Explain your answer given in (b) above.
d. Give two things which happen to blood from the heart when it reaches the lungs.
The diagram below shows the circulatory system of a human. The arrows represent the direction of the flow of blood in the body. A B Other parts of the body
Name the blood vessel A, B, C and D. Blood vessel A is Blood vessel B is
Blood vessel C isBlood vessel D is
a. Alveoli are small bags found in the
b. Why are we advised to breathe through the nose rather than through the mouth?
a. What is "suffocation"?
b. How can you help a person who is suffocating?
c. Name one disease caused by smoking.
a. One of the diseases we can get from eating dirty/unclean food is:
b. Give two ways to keep proper food hygiene.

36. The diagram below shows the human skeleton.

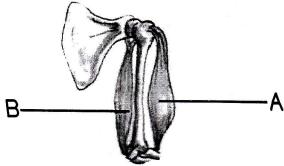

a. Name the bones A, B and C.

A _____

B_____

- b. Give one function of the human skeleton.
- c. Give one danger of walking or sitting in a bad position.
- 37. The diagram below shows the muscles of the human arm.

a. Name the muscles A and B.

A _____

В

b. What happens:

i. to muscle A when the arm is bent?

ii. to muscle B when the arm is bent?
